

Follow these steps in preparation for Bed Bug Service.

On _____ at _____ AM/PM, a Craig's Pest Service technician will stop by to treat for bed bugs.

Bed Bug Service requires a certain amount of preparation prior to the technician's arrival to make sure your home or apartment is properly serviced. Simply follow the steps listed below for the best results.

BEDROOMS

- All sheets, bedding materials and pillows *except the bottom sheet* should be removed from the beds and sealed in plastic trash bags in preparation of cleaning (see next step). This helps prevent spreading bed bugs to other rooms.
- Sheets, pillows and clothes stored under the bed (or in a dresser harboring bed bugs) can be washed in soap and hot water. Bed spreads, covers and other items that cannot be washed should be dried in the dryer at a high temperature for 30 minutes.
Please read the washing instructions on clothing items to ensure they will not be damaged.
- Please remove all clothes and all items from nightstands, closets, and dressers, place in bags and wash and/or dry at a high temperature in a clothes dryer for 30 minutes.
- Make sure all items are removed from under the bed. A thorough Vacuuming of carpets, closets and all baseboards needs to be done. Immediately dispose of bag. Items should remain in bags until infestation is under control in any infested area. Remove them from the bag and dry them at a high temperature for 30 minutes.

OTHER ROOMS

- Upholstered furniture in other rooms will need to be thoroughly inspected and possibly treated. Any blankets, throw pillows, etc. should be bagged and dried at a high temperature for at least 30 minutes.
- Vacuum carpeting and floor thoroughly, especially along the baseboards with a crack and crevice attachment.
- Dispose of the vacuum bag *immediately* in a sealed plastic bag in an outdoor trash receptacle.
- Remove electric outlet plates in all rooms to allow for treatment of wall voids.

PETS

- Aquariums should have the air pump disconnected and the top covered by a damp towel. Saltwater tanks may need to be removed from the premises as the air pump cannot be disconnected.
- Birds, dogs, cats and other pets should be taken to another location until after the treatments have had time to dry.

AFTER THE SERVICE

- Stay out of the space for a period of time long enough for any treatments to dry. Usually 3-5 hours.

If you need to reschedule your service, please give 24 hour notice. A \$75 reschedule fee will be added to the service if the home is not adequately prepared for the time of service.

Following these steps is essential to ensure the complete control of any bed bug infestation. It may take several weeks to gain effective control of bed bugs, so your patience and help are greatly appreciated.
